github.com/AshutoshRaj1260 | Portfolio

Technical Skills

Languages: Java, JavaScript, TypeScript

Frontend Technologies: HTML/CSS, React.js, Next.js, SCSS, Tailwind CSS, Redux

Backend & Database: Node.js, Express.js, REST APIs, WebSockets, SQL, MongoDB, Redis

Generative AI & LLMs: Mistral/OpenAI APIs, RAG, LangGraph, Pinecone, Jina AI

Docker & Cloud Platforms: Git, GitHub, Docker, Kubernetes, AWS

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP)

Projects

AI Orchestration & Web Analytics Engine [GitHub](#) [lumen-ai.dev](#)

- Engineered a production-ready, AI-driven Website Analyzer utilizing Jina AI and Axios to dynamically extract, sanitize, and process live DOM content for instant SEO/UX audits.
- Architected the scalable MERN infrastructure, optimizing the Node.js event loop and database queries to support 500+ concurrent users while streaming low latency Mistral AI responses via WebSockets.
- Built a hybrid authentication pipeline combining local JWTs, cookies, and Google OAuth 2.0 resolving cross-environment routing to ensure stable, strict HTTPS sessions.
- Deployed services via automated CI/CD pipelines to Render, engineering a transactional email verification system using the Resend API and verified custom DNS records to bypass traditional SMTP blocks.

Video-Sharing Platform [GitHub](#) [FoodGram](#)

- Full Stack Architecture:** Conceptualized and built a scalable MERN stack application, featuring a responsive React frontend with an auto playing video reel feed and an optimized Node.js/Express REST API.
- Open Source Leadership:** Scaled the project by onboarding it to GirlScript Summer of Code as Project Admin, defined branch rulesets, managed community workflows, and mentored contributors through PR reviews.
- Secure Authentication:** Implemented secure JWT based role authentication and integrated Google OAuth to establish separate access portals for general users and content partners.
- CI/CD & Containerized Deployment:** Containerized the application using Docker and configured automated Git-triggered CI/CD pipelines to build the React frontend and host the entire full-stack application under a single unified domain on Render.

Achievements & Leadership

GDGC MSIT (Web Team) Nov 2024 - Nov 2025

- Spearheaded a Web Development Team of 7 members, delivering 3 technical projects, including the official GDGC MSIT website built from scratch using responsive HTML, CSS, and vanilla JavaScript.

Hackerspace Club (CDP Team) Aug 2024 - Mar 2025

- Mentored 40+ juniors in weekly DSA sessions, resulting in improved coding interview performance for participants.

Smart India Hackathon (Internal Hackathon Winner) Aug 2023 - Sep 2023

- Architected and deployed a scalable full stack prototype within a highly competitive time-bound environment, demonstrating strong architectural decision making and coding proficiency.

Education

Meghnad Saha Institute of Technology Aug 2022 - July 2026

Bachelor of Technology in Computer Science and Business Systems, CGPA: 7.51
